MAKO

OUR STORY

THEN

MAKO started life in 2008 through the passion and hard work of founder Jérémie Chapon and business partner (and twice Olympian) Jessica Harrison. The first products they concentrated on were triathlon wetsuits with Jérémie deciding that the only way to find the perfect triathlon wetsuit would be to create it. The objective was to create something completely new. To do that it was necessary to go off the beaten track and try not to be influenced by the products that were already available. They didn't use any existing product as a starting point, wanting to create a completely new suit from the ground up. Using only premium materials Mako suits are simply the best wetsuits your can find for your money. No marketing "bells and whistles" just race tested improvements.

NOW

Now, 15 years on, MAKO is distributed all over the world. The brand continues to grow, working with many Elite and age group athletes to constantly test and improve the product-range, that now includes FINA validated swimwear, training kit and trisuits. Mako also provides a bespoke service for clubs, with high quality kit for swim, triathlon, cycling and athletics clubs and race organisers.

With this diversification our objectives have remained clear: providing innovation and quality with great aesthetics.

WETSUITS

WETSUITS TECHNOLOGIES

LOW CUT COLLAR / the collar is cut low to avoid chafing and the sensation of strangulation

SAFETY TAPES / heat-bonded elastic bands reinforce the most sensitive seam areas to protect and extend the life of your wetsuit

POWERSTRETCH / This elastic insert, along the sternum and diaphragm, provides better breathing and greater freedom of movement for the upper body.

BOUYANCY / Buoyancy is distributed to achieve the most efficient and natural swimming position. We offer a variety of neoprene compositions to meet the needs of every swimmer. Choose between our "NATURAL" wetsuits for a natural position with a strong kick, or "EXTRA SUPPORT" wetsuits for increased leg support during long distances or with a weak kick. Buoyancy is enhanced by Aerodome panels on the wetsuits EXTRA SUPPORT

AERODOME / air-capturing neoprene sandwich in panels to maximize flotation

RUN STRETCH / efficient, time-saving transition thanks to two elastic neoprene groin straps

PHYSIOFORM TECHNOLOGY / a perfect balance between freedom of movement and support. Our close-fitting cut makes sporting movements easier, reduces energy costs and offers optimum comfort. We carefully select our materials to give you a no-compromise experience. With PhysioForm technology, our products are designed to support you perfectly in your sporting activities.

44 / Yamamoto 44 is the softest neoprene in the Yamamoto range. It also offers greater durability than Yamamoto neoprene #40.

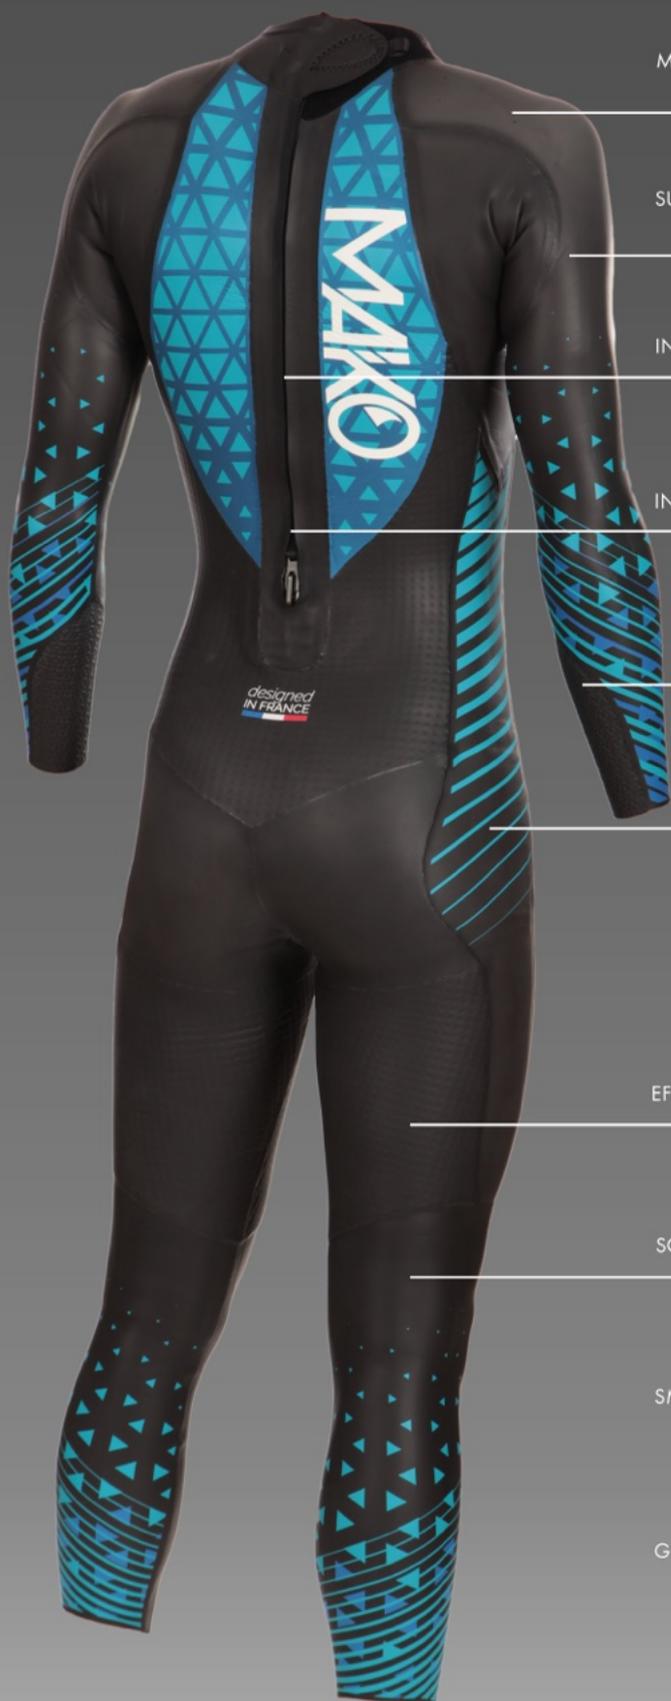

39 / Yamamoto 39 is the lightest neoprene in the Yamamoto range, offering the best buoyancy/elasticity ratio - perfect for body panels

LIMESTONE NEOPRENE / We only use limestone-based neoprene, which is mainly composed of calcium carbonate and is more environmentally friendly than petroleum-based neoprene. This type of neoprene also has the advantage of being lighter, with better buoyancy, more flexible and more durable over time.

MAX MOVEMENT SHOULDERS / construction giving total freedom to the shoulders, designed with the arms stretched out over the head

SUPER-STRETCH JERSEY / allows enormous freedom of movement in the shoulder area, with an inner jersey that can stretch 360 degrees

INVISIZIP / Our invisible zip system increases the hydrodynamics of our wetsuits and reduces water ingress.

INVERTED ZIP / allows faster opening and protects against accidental opening when swimming in a group

WATER WINGS / Creates and maintains forearm support

SCS NANO / Nanospheres allow for the fastest and most efficient neoprene coating in the world

SCS / coating protects the neoprene and increases glide

EFFET PULL-BUOY / Aerodome panels on the front of the thighs for extra flotation on the legs

SOFT TOUCH JERSEY / lycra jersey for greater comfort and quicker donning and doffing

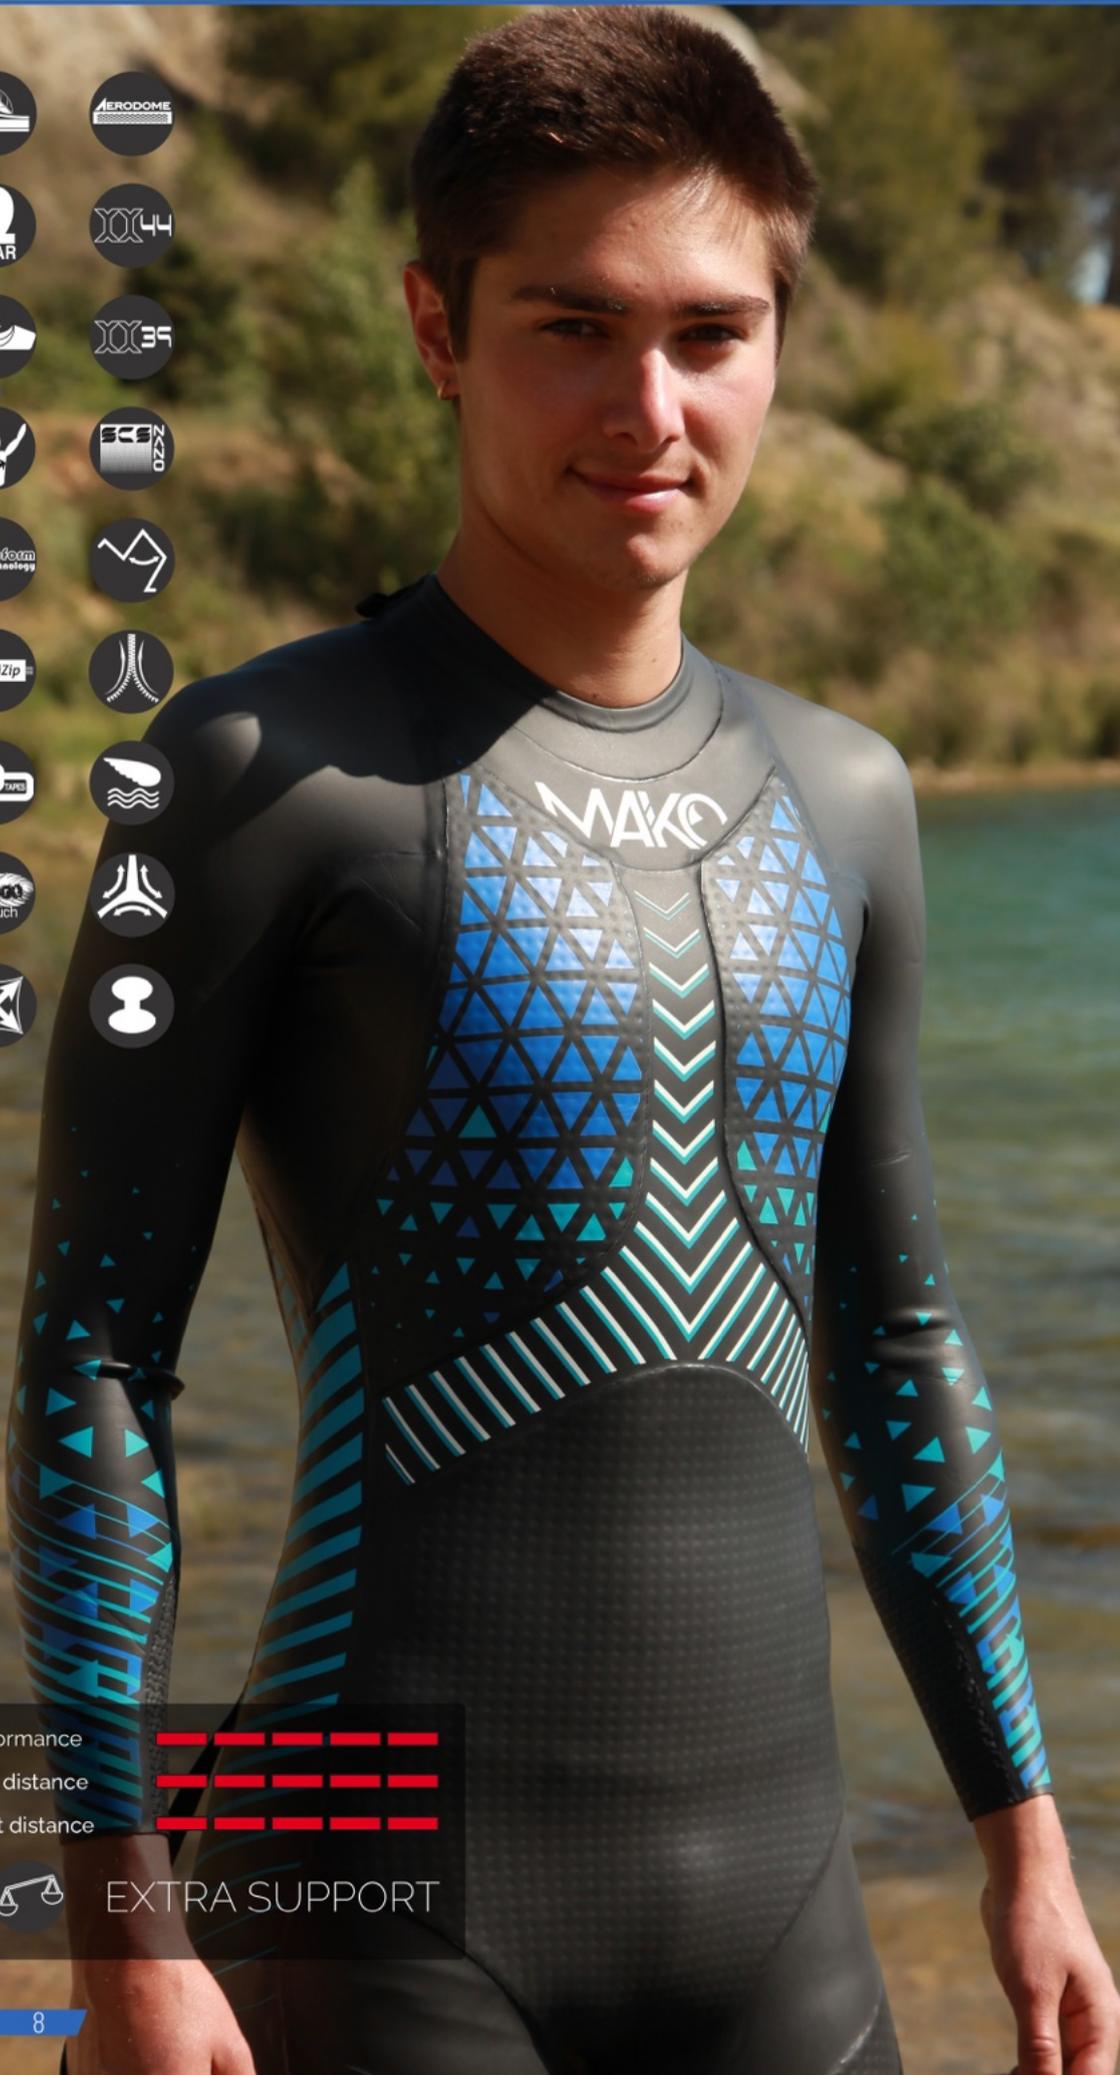

SMOOTHKIN / Smooth neoprene surface for excellent glide and water penetration

GUARANTEE / all our products have a 2-year warranty against manufacturing defects

 EXTRA SUPPORT

The Ultimate Torrent is, as the name suggests, a suit that showcases our 15 years of experience of making some of the best wetsuits in the world. This model is worn by Dorian Coninx (world champion 2023, Poissy Triathlon), Léonie Periault (5th Olympic Games in Tokyo) and Jeanne Lehair (gold medal WTCS Yokohama 2025).

Premium materials, unparalleled freedom of shoulder movement and extreme buoyancy... Simply the fastest!

ULTIMATE TORRENT

WOMEN	REF - 152004	(S/M/L)
MEN	REF - 151004	(S/SL/M/ML/L/XL)

TECHNOLOGIES

EXTRA SUPPORT the buoyancy of this suit is greatly increased thanks to the presence of Domecell neoprene on many of the panels

MAX MOVEMENT SHOULDERS the shoulders panels have been designed with the arms "at rest" above your head as they would be when swimming thus limiting mechanical fatigue. This combined with #44 neoprene, which is the most supple available, makes for incredible freedom of movement

AERODOME two layers of #39 neoprene create a sandwich around a layer of pierced neoprene trapping extra air in the panel for maximum buoyancy

POWER STRETCH this thinner panel of neoprene positioned along the sternum and diaphragm allows you to breathe unimpeded

INVERSED INVISZIP invisible zip, that reduces water entry. The zip is inverted to open top to bottom

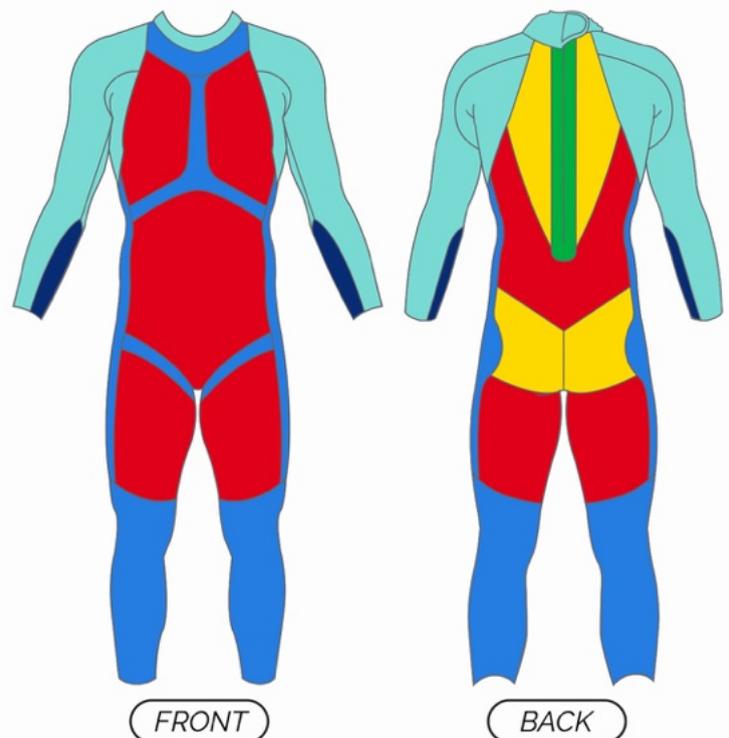

SUPER-STRETCH JERSEY the most elastic jersey on the market that can be stretched equally in all directions 360 degrees!

SOFT TOUCH JERSEY this lycra jersey increases the comfort factor allowing you to slip your wetsuit on and off with ease

LOW CUT COLLAR the collar is low cut to avoid rubbing and that horrible feeling of being strangled!

WATER WINGS we've used water wings intelligent skin on the forearms to keep a real "feel" for the water

	NEOPRENE	OUTER	JERSEY

NATURAL

We have developed this wetsuit to provide for the needs of the pure open water swimmer who requires a product that offers incredible restriction-free movement, a natural position in the water and extreme comfort. After extensive testing we opted for Yamamoto's #44 SCSnano neoprene for the whole of the arm unit due to its astonishing stretchiness which provides a barely-there feel. We opted for Yamamoto #39 SCS on the body, for its lightness (increased buoyancy) and durability.

The OWP has been FINA approved for official open water swimming races (FINA validation number - MK261210)

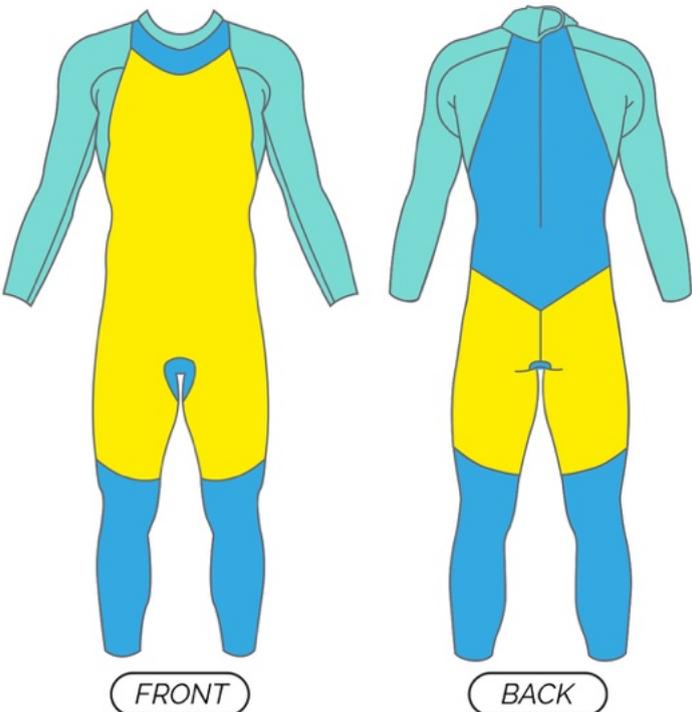

OWP

WOMEN	REF - 1102001	(S/M/L)
MEN	REF - 1101001	(S/M/L/XL)

TECHNOLOGIES

- NATURAL POSITION** this wetsuit offers a "natural" swimming position in the water
- MAX MOVEMENT SHOULDERS** the shoulders panels have been designed with the arms "at rest" above your head as they would be when swimming thus limiting mechanical fatigue
- WORLD AQUATICS VALIDATED** the OWP is on the FINA List of Approved Swimwear for use in official competitions
- INVERSED INVISIZIP** invisible zip, that reduces water entry. The zip is inverted to open top to bottom
- SUPER-STRETCH JERSEY** the most elastic jersey on the market that can be stretched equally in all directions 360 degrees!
- SOFT TOUCH JERSEY** this lycra jersey increases the comfort factor allowing you to slip your wetsuit on and off with ease

NAMI / NAIAD

designed
IN FRANCE

EXTRA SUPPORT

Our Nami and Naiad wetsuits benefit from several of the technical advantages and improvements validated over the last few years on our top of the range models. The inside is entirely laminated with lycra for extra comfort and the Nami and Naiad are equipped with our Power Stretch panel on the chest which gives unparalleled freedom of movement. There is an Aerodome panel present on both thighs for a "pull buoy" effect.

The aim of these models is to offer the best value for money possible whilst offering incredible performance akin to a premium suit.

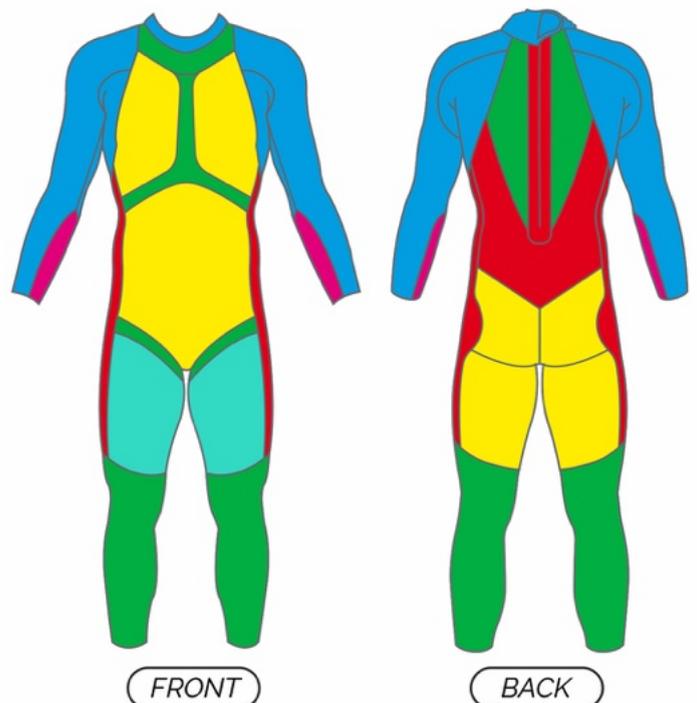

NAMI (MEN) / NAIAD (WOMEN)

WOMEN	REF - 132006	(S/SL/M/ML/L/LL)
MEN	REF - 131006	(S/SL/M/ML/L/XL/XXL)

TECHNOLOGIES

- EXTRA SUPPORT** we have added extra floaty panels to the thigh area to give a "pull buoy" effect when swimming
- MAX MOVEMENT SHOULDERS** the shoulders panels have been designed with the arms "at rest" above your head as they would be when swimming thus limiting mechanical fatigue
- AERONEO** two layers of #39 neoprene create a sandwich around a layer of pierced neoprene trapping extra air in the panel for maximum buoyancy
- INVISIZIP** the invisible zip limits water entry and closes from bottom to top allowing ease of closing when solo swimming
- POWER STRETCH** this thinner panel of neoprene positioned along the sternum and diaphragm allows you to breathe unimpeded
- SUPER-STRETCH JERSEY** the most elastic jersey on the market that can be stretched equally in all directions 360 degrees!
- SOFT TOUCH JERSEY** this lycra jersey increases the comfort factor allowing you to slip your wetsuit on and off with ease
- LOW CUT COLLAR** the collar is low cut to avoid rubbing and that horrible feeling of being strangled!

LANDANDSEA

To develop this product, that has been tailored to the extreme needs and specificities of Swimrun, we used the experiences and ideas of several athletes who have raced multiple Ötillö races.

The challenge was to find the correct balance between comfort, performance and durability. With the Land and Sea's anti-rub panels between the legs and reinforced bottom area and the trademark MAKO Ultra-stretch shoulders, we feel confident that our suit has what it takes to help you through the toughest of Swimrun races.

LAND AND SEA

UNISEX REF - 1131001 (XS/S/M/L/XL)

TECHNOLOGIES

LARGE REAR ZIPPED POCKET in which to carry your nutrition and other race essentials

MAX MOVEMENT SHOULDERS the shoulders panels have been designed with the arms "at rest" above your head as they would be when swimming thus limiting mechanical fatigue

ANTI-RUBBING external jersey on the bottom panels protects your wetsuit from damage

INVISIZIP front and rear 2 invisible zips that limit water entry

ULTRA-STRETCH JERSEY the most stretchy jersey on the market allowing amazing freedom of movement

SAFETY WHISTLE attached to the front zip pull

POWERBAND 0.5mm ultra-thin neoprene in a band at the end of the arms that limits water entry at this point and is highly comfortable

ARM TUBES the Land and Sea wetsuit is delivered with a pair of 2mm thick arm tubes to allow you a maximum of adaptability to all conditions

LS3

With our Swimrun wetsuit, the LS3, we wanted to offer a lightweight and affordable product, featuring a 100% limestone-based neoprene construction and very strong flatlock seams.

On the LS3 you'll find anti-chafe zones under the arms and on the buttocks and thighs, as well as our famous Ultra-Stretch shoulders cut.

The LS3 features a front zip, a whistle integrated into the zip, and a large back pocket for storing your gels and other essential race items (GPS/safety blanket).

Ideal for all race distances, from sprint swimruns to ultra distances.

TRISUITS

PRO AERO TRISUIT

Developed in close collaboration with professional athletes, this trisuit is a distillation of our expertise and offers unrivaled performance in terms of aerodynamics, support and comfort.

- Optimal fabric selection for each panel.
- Very light and breathable smooth fabric with Tekskin treatment (mechanical treatment improving aerodynamics) on the stomach, sides and upper back, combined with ribbed fabric placed in strategic areas to optimise aerodynamic gains.
- Seamless assembly for greater comfort and aerodynamics.
- Pockets positioned on the stomach to reduce aerodynamic drag.
- French Oeko-Tex 100 fabric.
- Self-locking, water-repellent zip with full opening at the front.
- Very lightweight, elastic and breathable chamois leather.
- Laser-cut finish on the thighs.
- PFC-free fabrics: more respectful of the environment and your skin, we do not use perfluorocarbons.
- Specific cut for men and women.

WOMEN'S SUMMER

MAKO swimwear is made using our H2Infinity recycled polyester fabric, and comes with a 2-year guarantee against manufacturing defects. H2Infinity is an Italian fabric made from 57% post-consumer recycled polyester and 43% PBT. H2Infinity is extremely resistant to chlorine and seawater and offers UPF50+ UV protection. Our prints are tested to guarantee very long colourfastness over time. That's why the lifespan is astonishing, both in terms of the strength of the material and the vibrancy of the colours.

CLUB CUSTOM

HOW TO ORDER

Each order is different and will be handled by our specialised team. The ordering process is very simple. Just follow the steps below :

1/ Contact

Send us your request. We will send you our order form and answer any questions you may have.

contact@mako-custom.com

2/ Design

We will create the graphic design together. This is free of charge if you place an order.

3/ Test

We will send the various products you have requested in different sizes to your home or to our nearest retailer.

4/ Order

Please send us the order form with your quantities and sizes.

5/ Réception

Between 6 and 8 weeks of production. Receipt of the order at our retailer or at your club/company.

Contact us now to discuss your project!

Phone: 02 22 66 49 20
contact@mako-custom.com
